

Intern Data Analyst

Job Description

Key Responsibilities:

- Explore and examine data from multiple, disparate data sources on social media platforms including SNS (Facebook, Youtube, Instagram, etc), Forums, etc.
- Sift through all incoming data to discover hidden insights and trends.
- Based on statistical reports to withdraw actionable recommendations.

Requirements:

- Passion in data analytics
- Critical thinking: able to look at numbers, data and come to new conclusions, insights based on the findings
- Experience in Tableau, R is a plus

How to apply:

- **Step 1:** Visualize the data sample ([HERE](#)) by different graphs, infographics or other pictorial diagrams (unlock your creativity, no limitation).

(You can use any data analytics and visualization tools)

- **Step 2:** Present the conclusions, insights or trends based on the visualization.
- **Step 3:** Send your results and CV to email: hanie.tran@kyanon.digital

Deadline for application: Friday, April 27th 2018

Number of available slots: 02
